

# 2026 Water Committee Recommendation #2

**“Daily log book in the water truck so we can understand the volume requirements for our farm”**

The committee vote was unanimous: 7-0.

We need to understand how much water we put on the road so we can plan for the future and also help the road committee with suggestions and improvements.

- A) The data results are a snapshot in time
- B) We need to establish a baseline
- C) The data helps us understand where else we can improve the farm efficiency and reduce costs
- D) Cost must be announced to farmers for transparency
